PROFILE

Self-directed software builder working across AI infrastructure, developer tools and responsive interfaces. Independent projects combine TypeScript, Python, Rust and React, with an emphasis on modular architecture, explicit permissions and source-reviewable work. Growing a UI/UX practice alongside engineering; seeking software, frontend and design-to-code opportunities.

SKILLS

Languages: TypeScript, JavaScript, Python, Rust, SQL
Applications: React, Next.js, Vite, Tailwind CSS, FastAPI, Node.js, Bun
AI & systems: LLM/provider integration, agent tool loops, MCP, SQLite, REST APIs
Workflow: Git, GitHub Actions, Docker, Linux, automated tests, documentation
Design practice: Figma, wireframing, prototyping, responsive layouts (developing)

SELECTED INDEPENDENT PROJECTS

DMR-X — AI Gateway & Adaptive Routing
https://github.com/danny-dis/dmr-X
• Developing a local-first gateway that separates provider/model routing from application orchestration.
• Work spans provider management, a React interface, configurable routing and fallback paths.
TypeScript / Bun / React / Vite / MCP

MOTE — Minimal Agent Execution Engine
https://github.com/danny-dis/MOTE
• Built a compact model-and-tool execution engine with capability grants, fallback and bounded runs.
• Provides a library/CLI and a separate bridge for application-owned Python and TypeScript tools.
Rust / Python / TypeScript / YAML / JSONL

Chimera — Multi-Agent Coding Workspace
https://github.com/danny-dis/chimera
• Developing a modular coding-agent workspace with solo, duo and trio coordinator implementations.
• Work covers provider integration, tool loops, context handling, sessions and developer interfaces.
TypeScript / Node.js / React / Git worktrees

Drift — Local-First Thinking Workspace
https://github.com/danny-dis/Drift
• Built a local workspace for ideas, repository context and research reports with retained sources.
• Pairs a React dashboard with explicit task review, local persistence and bounded model calls.
Python / FastAPI / React / TypeScript / SQLite

EDUCATION & AVAILABILITY

BSc Computer Science candidate — Murang'a University of Technology; expected graduation 2027.
Open to software, frontend and design-to-code opportunities. Based in Kenya, with daytime overlap with European teams and a self-directed, documentation-focused working style.
